

Projects

Confluence/Rovo: Answer Your Questions

- Built a **React** FAQ macro with a like/dislike feedback system, giving readers and page owners visibility into answer quality.
- Implemented automated escalation emails via **SendGrid API**, triggering alerts on poor like/dislike ratios to surface low quality responses without manual intervention.
- Reviewed and approved pull requests across a team of **6 developers**, identifying and addressing duplicated logic and buggy code to maintain code quality.
- Configured **automated test execution** on branch push, reducing manual QA overhead and catching regressions earlier in the development cycle.

BearGuide

- Designed and built the User Profile and Favourites screens in **React Native**, owning the full flow from **Figma** wireframe to working implementation
- Led **40% of usability testing sessions**, synthesising user feedback into actionable UI changes that improved navigation clarity across key app features
