Projects

Confluence/Rovo: Answer Your Questions

Tech: React, Javascript, CSS, Git, Jira

- Engineered an interactive FAQ macro using React that allowed users to rate response quality via a like/dislike system.
- Implemented an auto-escalation email feature, using the SendGrid API in vanilla Javascript.
- Reviewed and approved ~20% of pull requests by team members, monitoring and ensuring code quality.
- Participated in weekly stand-ups and adhered to Agile methodologies.
- Presented fortnightly live technical demos for the client and incorporated feedback into following iterations.

Shuu - Visual Habit Tracker (WIP)

Tech: React, TailwindCSS, SupaBase, Git

- Designed a normalised relational database schema in PostGreSQL (via SupaBase).
- Implemented CRUD interface, allowing users to create, log and modify daily habits.
- Integrated SupaBase backend services to handle SSO and authentication.

BearGuide

Tech: React Native, Balsamiq, Figma, Git

- Designed and implemented User Profile and User Favourites frames.
- Edited and produced the product video, introducing our problem statement and product scope.
- Conducted 40% of the usability tests resulting in UI updates to features like the heatmap toggle button.
