Projects

Confluence/Rovo: Answer Your Questions

Tech: React, Javascript, CSS, Git, Jira

- Designed and implemented the FAQ macro component using Figma and React.
- Implemented an auto-escalation email feature, using the SendGrid API in vanilla Javascript.
- Reviewed and approved ~20% of pull requests by team members.
- Monitored progress and proactively addressed code quality/stability concerns in meetings.
- Participated in weekly stand-ups and adhered to Agile methodologies.
- Presented live technical demos for the client and incorporated feedback into following iterations.

Shuu - Visual Habit Tracker (WIP)

Tech: React, TailwindCSS, SupaBase, Git

- Designed a normalised relational database schema in PostGreSQL (via SupaBase).
- Implemented CRUD functionality through SQL queries.
- Integrated SupaBase backend services to handle SSO and authentication.

BearGuide

Tech: React Native, Balsamiq, Figma, Git

- Designed and implemented User Profile and User Favourites frames.
- Edited the product intro video and recieved a perfect grade.
- Conducted 40% of the usability tests to iterate the design around a user-centered design approach.
